

# SKYLINE BRIDGE S.A. Self Assessed Carbon Footprint Results & Recommendations

Company name	SKYLINE BRIDGE S.A.
Data entered by	SKYLINE BRIDGE S.A.
Number of employees	1
Data period	1 January 2023 to 31 December 2023

Your total carbon footprint is 1.0 tonnes CO<sub>2</sub>e  
Carbon intensity (tonnes CO<sub>2</sub>/employees) = 1.0  
Read on for your full report & recommendations

To achieve Net Zero now, your organisation needs to adapt a carbon management process in the following order:

1. Measure- Assess your organisation's footprint (If you are reading this report you have already made the first step).
2. Carbon Offset- compensate for the damage already done with [CO2.CAPITAL](https://co2.capital) green carbon credits.
3. Reduce emissions in-house- reduce your footprint to decrease the amount of offsetting needed and your ongoing emissions.

## Your Carbon Footprint Report & Carbon Management Journey

Congratulations - you have completed the responsible first step of the 6 stage carbon management journey. Best practice is to complete the following stages on a 12-month cyclical basis.

Measure

Aim

Reduce

Offset

Communicate

Comply

### The purpose of this report is to

- Summarise your results
- Provide some tips for how you can set aims for your carbon management
- Help you to set a realistic carbon reduction target
- Suggest carbon offsetting to render your organization carbon neutral
- Work out the best way to communicate your carbon management/carbon neutrality internally and externally for your business's benefit
- Comply with either legislative or supply chain requirements

### Measure - Results

Measure

The data you entered into the calculator is shown on the next page.

## Summary of Data Supplied

### Buildings

Tonnes of COe	Energy Type
0.0	(no data supplied)
<b>0.0</b>	<b>Total building emissions footprint</b>

### Flights

Tonnes of COe	Flight Details
0.4	Economy class direct return flight from BLQ to LHR
<b>0.4</b>	<b>Total footprint for flights</b>

### Cars & Vans

Tonnes of COe	Car & Van Details
0.2	2000 km in a EU 2020 TOYOTA C-HR MY20 1.8l Hybrid Dynamic CVT
<b>0.2</b>	<b>Total footprint for cars &amp; vans</b>

### Vehicle Fuel

Tonnes of COe	Fuel Details
0.4	190 litres of petrol
<b>0.4</b>	<b>Total footprint for vehicle fuel</b>

### Bus & Rail

Tonnes of COe	Mode Of Transport
0.0	100 km travelled by taxi
<b>0.0</b>	<b>Total bus &amp; rail footprint</b>

The results have been calculated automatically using DEFRA and other internationally recognised metrics. Datasets have been entered entirely by the client and no checking has been done by CO2 Capital as to validity or completeness of the dataset.

### How good are these results?

Office administration based organisations generally have a carbon footprint of between 2 and 5 tonnes per employee.

High energy businesses such as manufacturing and those with very high travel/transport usage (e.g. logistics, waste management) will have a much higher footprint at around 10-30 tonnes per employee.

Here's how your carbon footprint compares:

### Aim - Setting realistic goals

Aim

Reducing your carbon emissions can save you money and reduce your impact on climate change.

Now that you have completed your Carbon Footprint, you should consider setting Suitable Measurable Achievable Realistic and Time-bound (SMART) targets to help achieve these reductions. A few key points and resources to consider are:

- Setting up a Carbon Management Plan - the old adage applies here - "fail to plan - plan to fail".
- Achieving easy carbon reduction first - even if these actions may yield only small results, these are psychologically important and will help your organisation to get a "taste" of success and develop a culture that enables you to tackle the bigger reduction opportunities.
- Get quantitative - use an energy efficiency test to work out your capacity to save.
- Be realistic - if your target is dependent on a massive capex that has yet to be signed or on a large cultural shift, you may want to be more conservative with your aims.

## Reduce - How to make it work and stay working

Reduce

Once your targets are set, you will need to implement suitable methods to reach them.

You will probably be heavily reliant on the actions of your teams for reductions to be achieved. Awareness campaigns including the use of tools such as informative posters and "Lunch and Learn" sessions can help motivate such behavioural changes.

Rather than relying on a volunteer committee and carbon champions, make your scheme more official by giving specific team members ownership of the reductions and placing the targets in their KPIs.

Celebrate successes with your staff when they occur and be clear on the difference and value this brings to the business. (Also see Communicate section).

## Offset - Compensate carbon emissions you cannot reasonably reduce

Offset

Carbon offsetting can render your organization carbon neutral - but it's much more than that. External programmes such as CDP (formerly Carbon Disclosure Project) award extra points for carbon offsetting organisations and offsetting is positively looked upon within sales tender/PQQs.

Carbon offsetting also frequently supports broader CSR and community outreach programmes. However, we only advocate carbon offsetting if you also have a carbon measurement and carbon reduction plan.

The cost to offset your carbon emissions is likely to be very small compared with your energy costs (frequently it's less than 2% of the spend) and much easier to implement compared with a behaviour change programme.

Reforestation and avoided deforestation carbon offset programmes are hugely popular as they tackle one of the most potent threats to our planet.

## Communicate - Internally & Externally

### Communicate

Make sure you communicate your actions & achievements effectively, both within your organisation, to help develop your culture and externally to help improve your brand image.

When promoting *externally* be sure to promote your actions via all marketing channels available to you - such as web-site, newsletters, brochures, press releases, conferences/events and social media etc.

Ensure to:

- Explain why climate change matters to you
- Be clear and accurate about what you've done
- Don't be tempted to exaggerate - this sector hates "green-wash" even if it's unintentional
- Evidence - use pictures more than words. Certificates, images of offset projects you are supporting and graphs of your carbon performance can help communicate your point in a clearer and more enticing manner.
- Tell a story - show where you have come from, the progress you have made and what your commitment is for the future

When promoting *internally*, ensure to:

- Explain Climate Change & Why it matters
- Get people involved (Also see Reduce section)

## Comply - legislation and best practice

### Comply

Make sure you do adhere to relevant legislation/supply chain needs. These may vary dependent on your location and the markets that you serve.

Keep up to date on law and best practice.

You have completed your carbon footprint calculation and have begun your carbon management journey. In doing so you are differentiating your business whilst doing your bit to combat climate change.
